

# Burnwire

REL-238

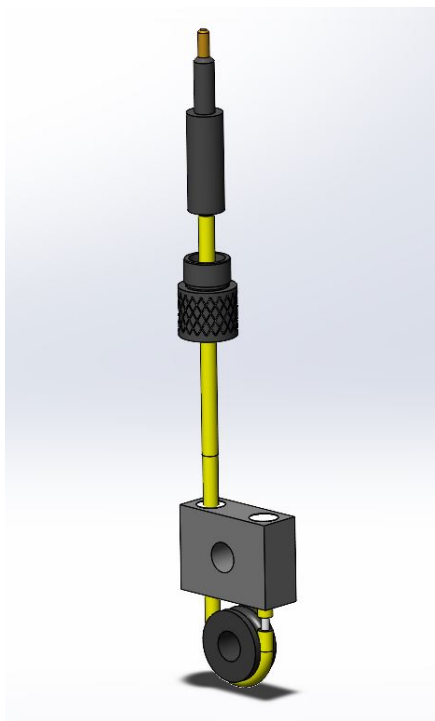

The Global Ocean Design **Burnwire** (REL-238) is a jacketed stainless steel wire that holds a load of up to 150-lbs (static) until a voltage is applied by either a Global Ocean Design acoustic release (REL-144) or Global Ocean Design time release (REL-123 or REL-423). Release is 6-15 minutes depending on voltage and environmental conditions.

The Burnwire includes a 316 Stainless Steel shackle and a SubCon ILM1M pigtail with a DLSM1-M locking sleeve. It fits in the Global Ocean Design **Burnwire Mount REL-158** (sold separately).

### Key Features:

- Side-load and torque tolerant
- Rated for 150-lbs (static)
- Proven to work at any depth
- No moving parts
- For deployments of up to one-year

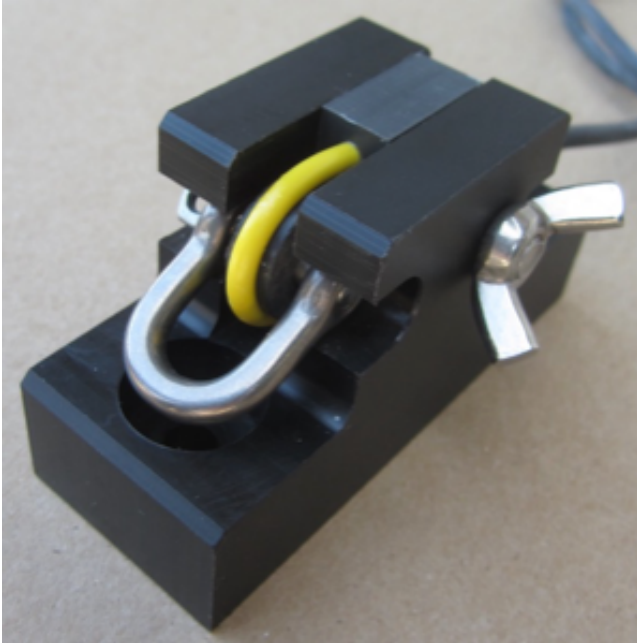

**Note:** Recommended to be used with the **Burnwire Mount REL-158** or **Pelican Hook Release REL-124**.

**Note:** Return the spent Burnwire with connector for a \$10 credit towards a replacement.

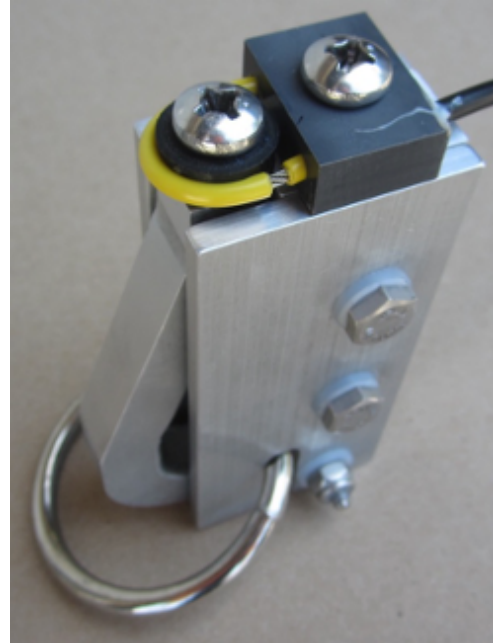

**REL-238**

## Companion Products

**Burnwire Mount (REL-158)**  
provides a secure mount to a  
lander frame

**Pelican Hook Mount (REL-124)**  
provides 5:1 mechanical  
advantage, holding up to 750-lb  
static weight
