

## Deck Purge Box (G-107)

The Deck Purge Box Model 125 (DPB) *dynamically* removes damaging moisture vapor from undersea housings of every kind prior to deployment. It is used with all Global Ocean Design Self-Sealing Purge Ports (G-101, G-102, G-129). The DPB is a safe and reliable solution to moisture control. The G-110 hose (blue) works with standard Edgetech Release purge ports, the G-112 hose works with SAE#4 fittings. So evolutionary, it was awarded a U.S. patent.

### Advantages:

1. Beautifully integrated into a single, compact robust package.
2. The DPB dynamically dries entrained air so you're ready to launch sooner.
3. With no HazMat, it is TSA Approved, and can be carried onto passenger aircraft.  
Plug it in after you arrive and it's ready to go.
4. No heavy, high-pressure inert gas bottles to carry and fill.
5. The crystal desiccant may be refreshed in an oven at sea.
6. Includes a spare vacuum diaphragm and an extra fuse, plus an easy-to-follow manual.
7. Use the G-113 adapter hose (red) to puff 5psi into a cylinder to remove a sticky endcap.

### Specifications

- Size: 16" x 13" x 7" (406mm x 330mm x 178mm)
- Weight: 10-lbs (4.5kgs)
- Power: universal 100-240 VAC, 50-60Hz, 100w.
- Standard 6-ft (1.8m) vacuum hose
- Additional replacement desiccant cartridges available (G-108)
